

Benjamin Healey

eventPress is a wordpress plugin that allows you to create and display your events on your wordpress site and then Share your events with other sites

Use eventPress if you are an artist trying to fill an audience, or raise awareness about your fund raiser.

The screenshot shows the WordPress admin dashboard with the 'Events' menu item selected. A modal window titled 'Edit Event' is open, displaying a form for creating an event titled 'Your Event'. The form includes fields for the event's content (with placeholder text 'Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quisque congue, sapien rutrum auctor accumsan, libero nunc ornare est, sit amet elementum est ante in lectus. Praesent ut lectus odio. Nam cursus ante nec ullamcorper placerat. Mauris augue tortor, ultricies viverra pulvinar quis, molestie sit amet nisl. Donec eget ex euismod, aliquam nulla a, cursus tortor. In quis est ut ante fringilla imperdiet. Quisque varius finibus lectus, sed tempus libero tristique vel.'), publishing options (Status: Published, Visibility: Public), and event details (Event Start Date: April 08, 2016, Event End Date: April 08, 2016, Event Venue: Redeemer University College). The bottom of the modal shows a 'Share' section with a 'Not Sent' status and a 'Share' button.
